

1. Name of Panel

Turning Tricks in Photoshop for Fun and Profit

2. Description (the one that will most likely go into the program book)

Learn some basic short cuts and/or time savers in Adobe Photoshop from Yad Mui. Yad has been using and abusing Photoshop for over 11 years. Creating everything from comics to wonderful stand alone illustrations, Yad is formerly of Imbrium Studios and even did some work for Studio Iron Cat back in the old days. Both traditional training and practical usage of the program has taught him much. And with a program like Photoshop the more you use it the more you learn from and about it. This panel will have a presentation followed by questions and answers! You don't want to miss a second!

3. How long would you like the panel to be?

1 Hour

4. How big do you expect this panel to be (in people)?

Room was filled to capacity standing room only at most places I did this.

5. What kind of room layout would you like?

Standard classroom style

6. What are the technical requirements of this panel?

Projector and VGA to VGA cable

7. What are the time conflicts or requests you'd like to make?

Not during cosplay and not on Sunday
